DOMINION COLOUR CORPORATION

REACH REGISTERED PRODUCTS

DCC offers a broad colour palette of pigments worldwide. To ensure ongoing supply to the European Union (EU), DCC has already successfully completed REACH registration for a wide range of our products.

As the EU enters into the final stages of registration, DCC is continuing to obtain the registrations for the remainder of the relevant substances in our product lines. After 31 May 2018, only those suppliers with REACH compliance (registration or exemption) may be in commerce in the EU. To guarantee an uninterrupted supply to the EU, please refer to our extensive selection of REACH registered pigment products.
